

JOB DESCRIPTION

Details	Requirements
Title	Asset Inspector
Reporting to	Head of Asset Operations
Location and Approach	Role is remote home -based working within strategic territories across Great Britain (currently there are 6 territories: these are Scotland, North, Midlands, London, South East, South West/Wales). Position comes with company car and requires significant travel within territory(s), with occasional overnight stays required. You will also be required to travel to the Head Office for meetings or locations outside your territory, as required.
Business Department	Operations
Role Context	ESP's ongoing success is dependent on the quality of the construction of the assets we adopt from our customers (UIP's and ICP's) whilst maintaining our relationships. In both instances the safety and performance of both our gas and electric networks are of paramount importance with construction audits leading 1 st tier assurance.
Role Purpose	<p>The Asset Inspector is part of a focused asset management team committed to the efficient design, construction, operation and maintenance of compliant and safe gas and electricity distribution networks.</p> <p>The Asset Inspector is responsible for ensuring that correct industry and internal standards and policies are adhered to whilst auditing the construction of new networks against approved design, construction standards, approved materials, competence of customers and obligations to our operating licences.</p> <p>As ESPUG is a multi-utility business, continued personal and professional development in both gas and electric networks is essential to build resilience and sustainability within the Operations team.</p>

JOB DESCRIPTION
